2025-2026-1 学年度《大学英语 3》综合教程单元练习

Unit 4 Cultural Heritage

适用范围：基础班

Part One: Language in Use
Directions: Choose the ONE that best completes each sentence from the four choices marked A), B), C) and D).

1. _____ is certain that she will succeed.
A. This
B. It
C. That
D. What

2. _____ he needs is more experience.
A. That
B. Why
C. What
D. How

3. It is still doubtful _____ she would play the part.
A. why
B. how
C. whether
D. that

4. I wish _____ she would understand me.
A. how
B. whether
C. if
D.that

5. I don't know _____ she has bought for Father's birthday.
A. that
B. which
C. what
D. whether

6. Jim suggested that we _____ to Huang Shan Mountain during the summer.
A. go

B. went
C. will go
D. have gone

7. Whether we can succeed depends on _____ well we cooperate.
A. what
B. why
C. how
D. that

8. He was not conscious of _____ an important discovery he had made.
A. what
B. which
C. that
D. how

9. We are not sure _____ we can persuade him out of smoking.
A. that
B. but
C. whether
D. how

10. This is _____ Jane lives.
A. what
B. when
C. where
D. how

11. It seems _____ it is going to snow.
A. like
B. likely
C. as if
D. whether

12. That is _____ Jack got scolded.
A. because
B. why
C. what
D. how

13. The news _____ we are invited to the conference is very encouraging.
A. what
B. those
C. that

D. why

14. The National Research Institute on Dunhuang Art was established, marking the beginning of the _____ journey.
A. conservation
B. reservation
C. protect
D. protection
15. Researchers adopted a new method of copying the murals that did not involve direct _____ with the wall surfaces.
A. contact
B. contract
C. contrast
D. contest
16. The use of computer technology was proposed to preserve the _____ Mogao Grottoes.
A. enduring
B. dangerous
C. danger
D. endangered
17. A digital display center for the Mogao Grottoes was built, making it possible for the cultural heritage of Dunhuang to be _____ at various venues outside of the grottoes.
A. appeared
B. demonstrated
C. revealed
D. exhibited
18. The website Digital Dunhuang was launched, allowing people from around the world to be immersed in _____ images and a panoramic tour of 30 famous caves.
A. high-resolution
B. high-defined
C. large-scale
D. wide-angle
19. The English _____ of Digital Dunhuang was launched, bringing the grottoes to even more people in 78 countries.
A. version
B. edition
C. issue
D. copy
20. The blockchain-based platform was established, which offers _____ to over 6,500 digital assets for download and co-creation.
A. entrance
B. approach

C. access
D. admission
21. The Dunhuang Academy and a Chinese tech company launched the Digital Library Cave, which provides the audience with an immersive _____.
A. experiment
B. experience
C. adventure
D. environment

22. I carefully examined every photograph in _____ detail with a magnifying glass so as not to miss a thing.

A. minute
B. minor
C. minimal
D. delicate

23. _____ from the ancient temple reveal fascinating details about agricultural practices and daily life centuries ago.

A. Articles
B. Artifacts
C. Products
D. subjects

24. From the mountaintop, we enjoyed a breathtaking _____ view of the valley below, stretching out as far as the eye could see.

A. panoramic
B. vast
C. extensive
D. broad

25. Museums worldwide continue to _____ precious cultural relics that tell stories of human civilization's journey.

A. gather
B. direct
C. accumulate
D. assemble

26. The intricate carvings on the ancient palace are _____ examples of the craftsmanship and artistry of that era.

A. expressive
B. exclusive
C. extensive
D. exquisite

27. Nature's beauty serves as a(n) _____ source of inspiration, connecting poets and artists across generations.

A. eternal
B. external
C. internal
D. eventual

28. The ancient philosopher's teachings have had a(n) _____ impact on the cultural and intellectual development of the region.

A. prolonged
B. founded
C. profound
D. prominent

29. Efforts to prevent the _____ of historical landmarks are vital for safeguarding cultural heritage.

A. deterioration
B. distraction
C. degradation
D. depression

30. The rise of _____ technology has revolutionized how we communicate, access information, and even conduct daily tasks like banking and shopping.
A. traditional
B. digital
C. mechanical
D. agricultural

Part Two: Reading Comprehension
Directions: In this section, there is four passages followed by some questions. For each of them, there are four choices marked A), B), C) and D). You should decide on the best choice.

Passage One

The Mogao Grottoes, a UNESCO World Heritage Site located near Dunhuang in northwest China, stand as a remarkable treasure trove(宝库）of Buddhist art. Known as the "Caves of the Thousand Buddhas," these ancient caves contain over 3,000 colorful sculptures and 45,000 square meters of exquisite murals spanning a period of 1,000 years. They represent an unparalleled cultural and artistic achievement, depicting religious stories, social customs, and historical exchanges along the Silk Road.

However, this precious heritage faces severe threats from both natural and human factors. The desert environment brings sand erosion, wind, and extreme temperature fluctuations, leading to the gradual **deterioration** of the fragile paintings and statues. Furthermore, the increasing number of tourists raises carbon dioxide levels and humidity inside the caves, which accelerates the damage.

To combat these challenges, the Dunhuang Academy has pioneered a groundbreaking solution: digital preservation. The project, named "Digital Dunhuang," involves using high-resolution cameras to capture **panoramic** images of the caves and **minute** details of the murals with millimeter-level accuracy. This data is then used to create 3D models and virtual reality experiences.

In 2022, a blockchain-based digital **repository** was established, **allowing** global access to over 6,500 **digital assets** for academic study and co-creation. In 2023, a collaborative project with a tech company led to the launch of the "Digital Library Cave," an immersive, game-like experience that recreates a lost ancient library. They also introduced a virtual ambassador, Jia Yao, to engage younger audiences through interactive stories.

The primary goal is not to replace physical visits but to ensure that the **profound** artistry of the Mogao Grottoes is **safeguarded** for future generations. Through these **eternal** digital archives, the stories and splendor of the Silk Road continue to inspire the world, proving that technology can become a powerful guardian of our past.

1. What is the main purpose of the "Digital Dunhuang" project?
A. To completely replace physical tourism.
B. To prevent all natural erosion in the desert.
C. To preserve and provide access to the grottoes' art digitally.
D. To build new caves for storing original artifacts.

2. According to the passage, which of the following is NOT a threat to the Mogao Grottoes?
A. Rising humidity levels from tourists.
B. The use of high-resolution cameras.
C. Sand erosion from the desert environment.
D. Fluctuations in temperature.

3. The word "deterioration**" in Paragraph 2 is closest in meaning to _____.**
A. worsening
B. improvement
C. discovery
D. exhibition

4. What can be inferred about the "Digital Library Cave" initiative?
A. It is a physical library built near the original caves.
B. It aims to attract younger generations through interactive technology.
C. It has replaced all traditional methods of preservation.
D. It focuses solely on academic research.

5. Which of the following best describes the author's tone towards digital preservation?
A. Doubtful and critical.
B. Supportive and optimistic.
C. Neutral and indifferent.
D. Nostalgic and hesitant.

Passage Two

Tea, often associated with China, has a deep and complex history in India, where it became a colonial cash crop and eventually a national passion. While India is now one of the world's largest tea producers and consumers, its relationship with the beverage is a relatively recent chapter in the long history of tea.

The story begins with the British East India Company. Seeking to break China's monopoly on tea and create a supply under their own control, the British identified the fertile lands of Assam in northeastern India. In the 1820s, wild tea plants were discovered growing natively in Assam, proving that the plant could thrive there. This discovery was a turning point. The British soon established vast plantations, known as "tea gardens," and launched a large-scale tea industry.

The development of this industry had profound social and economic impacts. Large area of forest were cleared to make way for tea bushes. Labor was a major challenge, so workers were recruited from distant and often poor regions. These tea garden workers, and their descendants, formed new communities in Assam and other regions like Darjeeling, profoundly shaping the local demographics.

Indian tea gained its own distinct identity. The teas from different regions developed unique characteristics. **Strong, bold, and malty** Assam tea became the backbone of the classic English Breakfast blend. **Delicate and aromatic** Darjeeling tea, grown in the Himalayan foothills, earned the nickname "the Champagne of Teas."

Unlike in China and Japan, where tea culture is often ceremonial（礼仪性的）, tea in India became a drink for the masses. The most famous Indian invention is "masala chai" — a sweet, spicy, and milky blend of black tea, herbs, and spices like ginger. It is sold on every street corner by "chai wallahs" (tea vendors) and is an integral part of daily life and social interaction.

Today, India is a tea giant. It is a major exporter, but the vast majority of its production is consumed by its own massive population. From its origins as a colonial enterprise, tea has been completely embraced into the fabric of Indian society, evolving from a British cash crop into a truly Indian icon.

1. What was the primary reason for the British to develop tea plantations in India?
A. To discover new wild tea species.
B. To provide jobs for the local population.
C. To compete with and reduce reliance on Chinese tea.
D. To introduce a new beverage to Indian culture.

2. What was a significant social impact of the tea industry's development?
A. It led to the immediate wealth of local workers.
B. It caused large-scale migration and changed local demographics.
C. It helped preserve the forests of Assam.
D. It made India the oldest tea-drinking nation.

3. The phrase "a turning point**" in Paragraph 2 is closest in meaning to _____.**
A. a gradual process
B. a critical moment of change
C. a minor event
D. a final decision

4. According to the passage, how is Indian tea culture different from that in China or Japan?
A. It is less flavorful.
B. It is more focused on export.
C. It is more casual and popular among common people.
D. It does not use any spices.

5. What is the main idea of the passage?
A. China is the true home of tea.
B. The British failed in their attempt to grow tea in India.
C. Tea in India has a unique history and has become deeply integrated into its society.
D. Darjeeling tea is the most expensive tea in the world.

Passage Three

In the fight against air pollution, one of the most effective and natural solutions stands silently all around us: trees. These natural air filters play a crucial role in improving air quality, making them essential guardians of urban and natural environments.

Trees clean the air through several remarkable processes. Firstly, they absorb harmful pollutants through their leaves. Gases such as nitrogen dioxide (NO_2), sulfur dioxide (SO_2), and ozone (O_3) enter the tree through tiny pores called stomata(气孔). Once inside, these gases are either absorbed by water within the tree or broken down through biological processes.

Secondly, trees are particularly effective at capturing particulate matter (PM) - tiny particles emitted from vehicles, industry, and construction that can damage human lungs. The rough surfaces of leaves and the sticky coating on some needles trap these dangerous particles. When it rains, these particles are washed to the ground, effectively removing them from the air.

Perhaps most importantly, trees perform photosynthesis, the process that makes them vital to life on Earth. They absorb carbon dioxide (CO_2) —a major greenhouse gas contributing to climate change — and release life-sustaining oxygen back into the atmosphere. A single mature tree can absorb approximately 48 pounds of carbon dioxide per year while releasing enough oxygen to support two human beings.

Urban areas benefit especially from trees' air-purifying abilities. Studies have shown that street trees can reduce particulate matter concentrations by up to 60% and nitrogen dioxide levels by up to 40% in their immediate vicinity. This natural air cleaning service becomes increasingly valuable as cities grapple with worsening air pollution.

However, not all trees are equally effective at cleaning air. Species with larger leaves, hairier surfaces, and greater overall leaf area tend to be more efficient pollution filters. Some of the most effective air-purifying trees include silver birch, London plane, and various pine species.

Despite their proven benefits, urban trees face numerous challenges including limited growing space, pollution damage, and climate change stresses. Protecting existing trees and planting new ones remains one of the most cost-effective strategies for improving air quality in our increasingly urbanized world.

1.What is the main purpose of the passage?C
A. To discuss the economic value of trees
B. To compare different tree species
C. To explain how trees help reduce air pollution
D. To describe the process of photosynthesis

2.How do trees remove particulate matter from the air?c
A. By absorbing them through their roots
B. By converting them into oxygen
C. By trapping them on leaf surfaces
D. By releasing special chemicals

3.According to the passage, what is one of the most important functions of trees mentioned?d
A. Providing shade for urban areas
B. Preventing soil erosion
C. Creating habitats for birds
D. Producing oxygen through photosynthesis

4.The word "vicinity" in paragraph 5 most likely means:b
A. Countryside
B. Immediate surrounding area
C. Forest
D. Laboratory

5.Which of the following is NOT mentioned as a challenge facing urban trees?d
A. Limited growing space
B. Pollution damage
C. Climate change stresses
D. Animal attacks

Passage Four

Sugar tastes good, but too much of it can be bad for your health. Many foods we eat every day contain sugar. While our bodies need some sugar for energy, most people eat far more than they need.

When we eat too much sugar, it can make us gain weight. This happens because sugary foods have many calories but don't make us feel full. This means we might eat more than we need. Being overweight can lead to other health problems.

Sugar is especially bad for our teeth. The bacteria in our mouths love sugar. When we eat sweet foods, these bacteria produce acid that can damage our teeth and cause cavities.

Another problem is that sugar can make our energy levels go up and down quickly. You might feel energetic after eating something sweet, but soon after you might feel tired and hungry again.

Some studies show that eating too much sugar might make it harder for our bodies to use insulin properly. This can eventually lead to type 2 diabetes, a serious health condition.

The good news is that we can make better choices. Try to eat fresh fruits instead of sugary snacks. Drink water instead of soda. Read food labels to check how much sugar is in packaged foods.

Remember, it's okay to enjoy sweet foods sometimes, but it's best to eat them in moderation. Your body will thank you for making healthy choices!

1.What is the main idea of this article?
A. Sugar is always bad for you
B. We should never eat sugar
C. Too much sugar can cause health problems
D. Sugar is the most important food for energy

2.Why is sugar bad for our teeth?
A. It makes teeth too white
B. Bacteria use sugar to make acid that damages teeth
C. Sugar makes teeth fall out immediately
D. Sugar has no effect on teeth

3.What happens to our energy after we eat something sweet?
A. It stays the same all day
B. It goes up and then down quickly
C. It makes us never feel tired
D. It only gives us energy at night

4.What is one good choice we can make about sugar?
A. Eat more candy

B. Drink more soda
C. Eat fresh fruits instead of sugary snacks
D. Never read food labels

5.The word "moderation" in the last paragraph means:
A. eating as much as you want
B. eating only at night
C. eating reasonable amounts
D. never eating

Part Three: Writing

Directions:
Please write an English letter to introduce your hometown to your friend and invite your friend to visit. You will have 30 minutes for the task. You should write at least 120 words but no more than 180 words.
